Career Objective

Full-stack software developer with expertise in both front-end and back-end development. Seeking a web developer internship to apply my skills and gain valuable industry experience.

Technical Skills

- Front-End -: HTML ,CSS , JavaScript , Bootstrap , ReactJS .
- Back-End -: Node.js , Express.js , JavaScript .
- Database -: Mongodb .

Projects

1) Fertilizer Predictor

- Description: Developed as part of the Smart India Hackathon (SIH), this web-based application predicts the most suitable fertilizer for crops based on soil conditions and environmental factors.
- Technologies Used: HTML, CSS, JavaScript, Python, Mysql.

2) College Predictor:-

- Description: Built a web application that helps students determine their eligibility for colleges based on their JEE and MHT-CET scores. The tool uses historical data and student inputs to provide personalized predictions.
- Technologies Used: HTML, CSS, JavaScript, Mysql.

3) Rental Application

- Description: Designed and developed a full-stack rental application for renting cars and equipment, such as cameras and drones. The platform allows users to search, book, and manage rentals, ensuring a seamless experience for both customers and providers.
- Technologies Used: HTML, CSS, ReactJS, JavaScript, MUI, Vue.js, Node.js, MongoDB.
